EDUCATION

University of Pécs

Bachelor of Science in Computer Science

Hungary

- Courses: Programming (I & II), Web Programming, Algorithms, AI, Data Analysis, Networks, Databases
- Mathematics: Discrete Math, Linear Algebra, Calculus, Probability, Statistics; Systems: Software Technologies, Operating Systems

WORK EXPERIENCE

BitNorm

Jul 2025 – Present

Full-Stack Developer

Remote, Netherlands

- Contributing to **BitNorm's cloud-based analytics platform**, shipping TradingView-inspired charting functionalities and sophisticated analytical dashboards supporting **50K+** users
- Architecting scalable backend APIs with **Node.js, Express, PostgreSQL**, prioritizing clean architecture and improving data processing efficiency by **20%** during load testing
- Implemented **10+ reusable React + TypeScript components** for complex market data dashboards, optimizing frontend rendering and reducing UI edge cases by **15%**

Buildspace

Apr 2025 – Jul 2025

Full-Stack Developer

Remote, United States

- Designed and deployed an AI-driven, full-stack application from concept to launch in **4 weeks** using **React, TypeScript**, and high-performance backend APIs
- Achieved **100%** milestone completion; optimized rendering pathways and client state management for **35% faster** seamless performance

StuDev, University of Pécs

Sep 2024 – Mar 2025

Front-End Developer

Pécs, Hungary

- Enhanced UI responsiveness by **40%** and improved user engagement by **25%** using **React + TypeScript** optimizations and scalable frontend design patterns
- Revamped analytical tracking interfaces with **Tailwind CSS**, contributing to a **30%** reduction in bounce rate; integrated data pipelines with secure PostgreSQL systems

PROJECTS

Adaptive AI Learning Companion |

FastAPI | React | PostgreSQL | pgvector

- Built a full-stack learning application engineered with semantic search, automated content validation, and a custom personalization engine leveraging Laplace smoothing metrics
- Integrated **pgvector** for context retrieval, tracking information accuracy through vector similarity calculations and cosine distance matching driven by the **Gemini API**

Tech E-commerce Shop |

React | Node.js | PostgreSQL

- Built a responsive full-stack e-commerce platform with **authentication, cart, wishlist, and checkout systems**; developed an admin dashboard for products, users, and orders
- Implemented REST API integrations and PostgreSQL-backed data handling; executed **350+** unit and E2E test cases, identifying **70%+** defects early

AI Link Summarizer |

Next.js | OpenAI API | Redux

- Developed a web app that summarizes article URLs using AI models; integrated **Next.js** for optimized rendering and **Redux** for centralized state management

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C/C++, Java, C#

Developer Tools: AWS, Git, GitHub, Docker, CI/CD, Postman, Redis, Grafana

Libraries/Frameworks: ReactJS, NextJS, FastAPI, Angular, NodeJS, Express, NestJS, .NET, PostgreSQL, pgvector, MySQL, MongoDB, Redux, Tailwind CSS, JWT, REST APIs

Exposure: OpenTelemetry, Kubernetes, Terraform, GraphQL, Elasticsearch
